Code With Lasthope

Frontend Developer

codewithlasthope@gmail.com • +880 1577111936 • github.com/codewithlasthope

PROFILE

Frontend developer focused on building responsive and interactive web experiences. Hands-on experience developing browser-based applications with HTML, CSS, and JavaScript, with current focus on strengthening modern frontend development and React.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React
Development	Responsive Design, REST APIs, Local Storage
Tools	Git, GitHub, VS Code, Vite

PROJECTS

BMI Calculator

• Responsive BMI calculator with calculation history and data visualization. Built with HTML, CSS, and JavaScript; includes dark mode and interactive analytics.

Weather Dashboard

• Weather application using a weather API to retrieve and display current weather information with a responsive interface.

Sticky Notes

• Browser-based notes application with note management, search, sorting, favorites, pinning, archiving, themes, export, and local storage.

Chatbot Application

• Interactive chatbot application focused on building a responsive conversational interface and practicing client-side JavaScript interaction.

Education Center Page

• Responsive education-focused website interface designed to present course and service information in a clear, structured layout.

ADDITIONAL DEVELOPMENT

Experience with Leaflet-based maps, geocoding/search interfaces, asynchronous JavaScript, AbortController, caching, and responsive UI patterns.

CURRENT FOCUS

Building polished frontend projects, strengthening JavaScript fundamentals, and progressing toward modern React-based application development.

EDUCATION

BBA — Business Administration
Currently pursuing undergraduate coursework.
